

Coventry City Council

Coventry City Council is the local governing body responsible for the City of Coventry.

Arrow County Supplies support Coventry City Council with a tailored product portfolio that ensures their buildings and facilities remain spotless.

The Problem

Expensive maintenance and chemical costs.

Dull, dirty flooring collecting debris and bacteria.

Couldn't be cleaned using traditional methods.

Arrow provides bespoke solutions, based around our customers' requirements. When Coventry City Council raised concerns about flooring that was becoming difficult and labour-intensive to clean. Arrow assessed their needs, budget and abilities to provide the most effective solution.

The solution is the Ocelot, designed and manufactured by industry leading floorcare brand, Victor. The Ocelot is a specialist safety floor cleaning machine that delivers immaculate results - removing even deeply penetrated debris and bacteria. Equipped with a microfibre pad at the base that collects and removes dirt, the Ocelot provides a perfect finish, whilst minimising the need for chemicals.

BEFORE

AFTER

The Ocelot

Easy-to-use - delivers optimal cleaning performance with minimal training

Edge-to-edge cleaning - the 400mm drive board reaches difficult-to-reach areas

Reduces chemical use - 3,000 oscillations a minute and microfibre pads are highly effective and minimises the need for detergents

Compact and lightweight - weighs only 16kg and is incredibly slimline.

How safe is your safety flooring?

Designed to prevent accidents in commercial environments due to its anti-slip ridges, the gaps in safety flooring encourages a thick build-up of debris and germs. This decreases the effectiveness of the floors anti-slip properties and makes the flooring difficult and labour-intensive to clean. When left to accumulate, the flooring becomes dirty, unhygienic, and ultimately unsafe.

Safety Flooring features a 'pitted' surface to reduce slips.

Dirt gets trapped within the pits of the floorings surface.

Traditional mopping only skims the peaks, leaving dirt behind.

Over time, dirt builds up in the gaps of the safety flooring.

The Ocelot removes the built in debris and restores the flooring.

“

The machine provided from Arrow is excellent, the floor is visibly clean and stain-free, and has saved us money on buying chemicals.

"The Ocelot isn't just effective with safety flooring, it has provided amazing results throughout our facilities, including kitchen flooring, corridors and communal spaces - the flooring looks like new!"

- Senior Area Co-ordinator at Coventry City Council
